**JUN 12 1968**
CHART OF THE CHARACTERISTIC
BRITISH TERTIARY FOSSILS
STRATIGRAPHICALLY ARRANGED.
(Containing upwards of 500 figures)
Compiled and Engraved by J. W. LOWRY.
Figures Drawn by C. R. BONE.

Price, folded in Cover, 4s., or on Canvas and Roller,
varnished, 6s.

LONDON:
EDWARD STANFORD, 6, 7 & 8, CHARING CROSS, S.W.
**BAGSHOT SERIES**

1. **Upper Bagshot Beds 120**
   
   1. Bright yellow sands at the base, succeeded by white sand — this number is almost destitute of organic remains.

2. **Barton Beds 300**
   
   2. Greyish gray and sandy clay with numerous layers of Septaria — this series is extremely rich in organic remains of marine origin.

3. **Bracklesham Beds 100**
   
   3. Dark green & chocolate coloured clays & sandy clays and marls also white, yellow & crimson sands in the upper part as seen in Alum Bay Isle of Wight. Much Lignite in the lower part, the lower portion is extremely fossiliferous at Bracklesham Bay. Sussex.

4. **Lower Bagshot Beds 650**
   
   4. Alternations of pale yellow or grey sands and clay — bands of white flint clay and beds of iron Sandstone &c. The flint clay contains a remarkable assemblage of leaves of sub-tropical plants.
FIGURES OF THE CHARACTERISTIC BRITISH TERTIARY FOSSILS, CHIEFLY MOLLUSCA STRATIGRAPHICALLY ARRANGED.
DIAGRAMS OF NATURAL HISTORY.

These Diagrams, compiled by the eminent scientific men whose names are appended, are drawn with the strictest regard to Nature, and engraved in the best style of art. The series consist of Eleven Subjects, each arranged so that it may be mounted in one sheet, or be divided into four sections and folded in the form of a book, thus rendering them available either for class exercises or individual study.

The Price of each, Folded in Book Form, 4s.; or Mounted on Roller and Varnished, 6s.

Exhibits nearly 600 of the more prominent forms found in British Strata.

This Diagram illustrates upwards of 800 specimens of the Tertiary Formation.

Consisting of about 500 illustrations of the Orders and Sub-Orders, and showing their range in geological time.

IV.—The Vegetable Kingdom. By A. Hensley.
Each Order is illustrated by numerous examples of representative species.

V.—The Orders and Families of Mollusca. By Dr. Woodward.
Represented in Six Classes:—Cephalopoda, Casteropoda, Pteropoda, Conchifera, Brachiopoda, and Tunicata, illustrated by over 400 examples.

VI.—Myriapoda, Arachnida, Crustacea, Annelida, and Entozoa.
By Adam White.
The tribes represented are illustrated by upwards of 180 examples.

VII.—Insects. By Adam White.
Contains nearly 250 drawings of the different Orders:—Coleoptera, Euplectoptera Orthoptera, Thysanoptera—Thripidae, &c.: Neuroptera, Trichoptera, Hymenoptera Strepsiptera—Hyalethrus rubis, Lepidoptera, Homoptera, Heteroptera, Diptera and Aphaniptera.

VIII.—Fishes. By P. H. Gosse.
Showing over 130 of the most conspicuous types, in their Orders and Families.

Contains 185 typical forms: selected from Chelonia, Loricata, Amphibia, Sauria, Ophidia, and Amphibia.

X.—Birds. By George Gray.
Contains drawings of 200 of the leading illustrative specimens, namely: Accipitres, Passeres, Scansores, Columba, Gallinae, Struthiones, Galline, and Anseres.

XI.—Mammalia. By Dr. Baird.
Exhibits 145 of the chief illustrations selected from the several Orders:—Quadrumana, Cheiroptera, Carnaria Felidae, Viverridae, Canidae, Mustelidae, Tapidae, Ursidae, Macropidae, Phocidae, Cetacea, Rodentia, Ruminantia Bovidae, Cervinae, Equidae, Pachydermata, and Edentata.

Price, folded in Cover, 4s.; or on Canvas and Roller, varnished, 6s.

Table of British Sedimentary and Fossiliferous Strata.
The Description of Life Groups and Distribution by R. Etheridge, F.R.S.
